IAIASa 2008/2009 BALLOT

**You may vote for *two* (2) new members to the National Executive Committee of IAIASa.
Please tick you choices**

- Ilse Aucamp** has 12 years of combined professional experience in social development, community development and social impact assessment, having practiced in the field since January 1995. She holds a Masters degree in Environmental Management from the University of Potchefstroom and a B.A. degree in Social Work from the University of Pretoria. Her academic knowledge has been supplemented by a variety of short courses on various aspects of environmental management and social aspects. In addition, she is currently busy with PhD studies in the field of Social Impact Assessment at the University of Pretoria. She frequently acts as a guest lecturer on Masters and Honours programmes in Environmental Management, Social Development and Engineering and has presented three papers at international conferences in the last two years. Ilse has been elected as the chair person of the Social Impact Section of IAIA.

Ilse is a motivated and hardworking member in all organisations in which she becomes involved. She is very involved in IAIA as the session chair for Social Impact and she thus brings important international experience to the NEC. She has a creative approach to her tasks and her social perspective in terms of IAIASa business is invaluable. She has been actively involved in preparing for the IAIASa 2008 annual conference.

- Rod Bulman** has a Masters in Social Science, Policy and Development which was awarded cum laude from the University of KwaZulu-Natal in 2003. The focus of his thesis was on Public Participation as a factor in the development of policy. Over the years Rod has gained invaluable experience in strategic planning, which has been utilised by provincial and national government departments and other organisations. Rod Bulman is acknowledged as having extensive experience and expertise in planning, managing and implementing public consultation processes.

Rod has been an active member of the KwaZulu-Natal IAIASa for many years. He has chaired the KwaZulu-Natal branch for two years. In this time he has focused the branch's attention on issues of professionalism and best practice. Rod has contributed significantly to the conceptualisation and planning of this year's conference programme in which he has laid the foundation for a format which encourages debate on critical issues in our emerging profession. I believe that Rod will bring a range of invaluable skills and experience to the National Executive Committee at a time when our profession is growing and changing at a rapid pace.

Please see overleaf/.....

- **Ishmael Kgabo Semanya** is director of EnviroXcellence Services. He holds a BSc (Hons) degree in Microbiology from the University of the North; Higher Education Diploma (HED), University of the North; Environmental and GIS Training, Walsh Colorado State, USA; Occupational Safety and Health Administration (OSHA) certificate, Red Rocks College, Colorado State, USA; and is an EIA and water quality specialist. Ishmael is currently working with the team of experts seconded to Qatar for the development and implementation of the Environmental Management Plan for the new Doha International Airport.

Ishmael has executed and managed over 300 EIA projects, ranging from Eskom to almost all government departments, including the Department of Water Affairs and Forestry for the Flag Boshielo dam project and 2010 FIFA world cup projects.

Ishmael is one of the longest serving environmental practitioners since the introduction of Environmental Impact Assessment as a tool for environmental conservation and protection. His company, EnviroXcellence Services, has been in operation since 1998 and consults both nationally and internationally.
